On January 11, 2021, J Capital Research issued a research report alleging, among other things, that Bit Digital operates "a fake crypto currency business" "designed to steal funds from investors." Though the Company claims "it was operating 22,869 bitcoin miners in China," J Capital alleged that "is simply not possible" and stated that "[w]e verified with local governments supposedly hosting the BTBT mining operation that there are no bitcoin miners there."

On this news, Bit Digital's stock price fell \$6.27 per share, or 25%, to close at \$18.76 per share on January 11, 2021, on unusually heavy trading volume.

Throughout the Class Period, Defendants made materially false and/or misleading statements, as well as failed to disclose material adverse facts about the Company's business, operations, and prospects. Specifically, Defendants failed to disclose to investors: (1) that Bit Digital overstated the extent of its a bitcoin mining operation; and (2) that, as a result of the foregoing, Defendants' positive statements about the Company's business, operations, and prospects were materially misleading and/or lacked a reasonable basis.
